Profile Summary

Highly motivated Computer Science Engineering graduate from BVCOE, Kolhapur, with a proven ability to solve complex problems and deliver technical solutions. Adept at leveraging programming, development, and analytical skills to contribute effectively in a team-oriented environment.

Skills

Technical Skills: Python(Advance), Java(Basic), C,C++, MachineLearning,, DataAnalytics, SQL, HTML, CSS, JavaScript, Prompt Engineering, N8N (AI Automation)

Technical Tool:-VS Code, Jupiter Notebook, Pycharm, Turbo c,,c++

AI Tools :- GitHub Copilot, ChatGPT, DeepSeek, Google Gemini, Amazon CodeWhisperer, Codeium

Web FrameWork :- Django,Bootstrap

Database Interactions: SQL

BackEnd :-PHP

Behavioural Skills: Problem-solving, Adaptability, Effective Communication, Team Collaboration, Leadership

Education

Bharati Vidyapeeth College of Engineering, Kolhapur, B Tech (CSE-AIML) - CGPA - 8.05/10 (2021-2025)

Bote Junior College of Science, Kapshi(S), HSC (PCMB) – 89.60% (2021)

Mohanlal Doshi Vidyala Arjunnagar, SSC - 80.80% (2019)

Certifications: Introduction to HTML & CSS (Lets Upgrade), Data Analysis with Python (Lets Upgrade),Java Programming With JDBC(Apt Tech) ,Fundamentals Of Full stack Developer (ExcelR), Data Analytics Job Simulation (Deloitte), Google Analytics (Google),Oracle Certification in Data science ,Oracle AI Foundation & GenAI(Oracle)

Projects

1. Diabetes Analysis By Sympotoms:

Technologies Used – C++, SQL.

This Analyze diabetes releated data, focusing on extracting meaningful insights from patient records to support healthcare decisions.SQL was used for efficient database management and querying, while C++ handled the data processing and analysis logic.

2. Hotel Booking Cancellations Using Data Analysis:

Technologies Used: Excel, Power BI

Analyzed booking cancellation trends using Excel, Power BI Reducing Cancellation By 15% created Dashboards and reports to visualize data insights,Stastical analysis

GitHub:- <https://github.com/shreyassunilawate/Hotel-Booking-cancellations-Analysis-using-Excel-and-PowerBI>

3. Air Canvas Gesture Based Drawing in Mid Air:

Technologies Used: Python, OpenCV, NumPy, MediaPipe

Developed a real-time gesture-based drawing application that allows users to draw or write in the air using hand gestures captured through a webcam. Implemented computer vision techniques for hand tracking and gesture recognition, demonstrating practical use of AI-based human-computer interaction.

GitHub:- <https://github.com/shreyassunilawate/Air-Canvas-Gesture-Based-Drawing-in-Mid-Air>

4. Personal Portfolio Website:

Technologies Used: HTML, CSS, JavaScript, Bootstrap.

Designed and developed a responsive personal portfolio website to showcase projects, technical skills, and professional information. The website includes sections for projects, skills, and contact details, providing a centralized platform to present work and achievements. It is deployed online for easy access by recruiters and collaborators.

Link:- <https://portfolio-shreyas-awate-vls2.vercel.app/>

5. Student Management System (CRUD Application)

Technologies Used: Django, Bootstrap, SQL

Developed a web-based student management system that allows users to Create, Read, Update, and Delete (CRUD) student records. Implemented Django's MVC architecture for backend logic and used Bootstrap for responsive UI design. The system allows administrators to manage student information efficiently through a simple web interface.

6. Smart Customer Feedback Management System :-

Technologies Used: n8n, Prompt Engineering, LLM APIs

Designed and developed an intelligent feedback management solution that processes customer feedback in real time. Integrated LLMs to understand customer intent and classify feedback into actionable categories such as Complaints, Compliments, and Feature Requests. Automated the workflow using n8n to enhance operational efficiency.

Extra-curricular Activities And Internships

- Participate in 11th National Conference Bharati Vidyapeeth college Of Engineering Kolhapur
- Internship: 1. Vendi Bite Pune:- Working In Raspberry pi & using Raspberry, Time, Csv, Pygame modules. smart vending machines feature the best fresh Biryani, rice plates, and the latest beverages.

Leadership

- Led AIML Department in Techno Bharti 2023 and Class Representative More Than 5 years in school and college duration
